TODD A. MORROW, MD, FACS

For 17 years, Dr. Todd A. Morrow, a founding partner of Associates in Otolaryngology of New Jersey, has provided an unparalleled level of care to his patients.

Board certified in facial plastic and reconstructive surgery and otolaryngology, Dr. Morrow performs cosmetic and reconstructive facial surgery, specializing in cosmetic nasal surgery (rhinoplasty) and ear surgery (otoplasty); injectables (Botox, dermal fillers); facial reconstruction (scar revisions, surgical treatment of deformities following MOHS surgery for skin cancer and facial fracture repair); aesthetic laser and endoscopic procedures; and non-surgical facial rejuvenation, which is accomplished by judiciously using soft tissue fillers for restoring volume lost during the aging process. In addition, a personalized medical skin care program is established for each patient with the help of his

licensed and certified aesthetician who performs microdermabrasion and chemical peels.

For patients' convenience and comfort, surgery is performed at a private, ambulatory surgery center near Dr. Morrow's West Orange office. There, a highly qualified operating team of anesthesiologists and nurses, hand-picked by Dr. Morrow, provides results that are consistently outstanding. Using computer imaging, he is able to show patients a visual image of the anticipated results of their treatment. This helps to reduce their anxiety and ensure their expectations are realistic.

Continuously rated as one of the top doctors in the New Jersey/New York metropolitan area, Dr. Morrow believes in an individualized, comprehensive treatment plan for each patient, performing all procedures and injectable treatments himself. His goal is to

accommodate each patient's request while keeping their safety and well-being in mind at all times.

In an ongoing effort to obtain optimal results for his patients in the safest manner possible, Dr. Morrow stays current on the latest techniques and technology within his field.

Although Dr. Morrow has performed thousands of facial plastic procedures (cosmetic and reconstructive), he measures his success by the quality of his work rather than the quantity. He feels honored and privileged to be entrusted with the care of every patient he treats. He is proud and grateful for the opportunity to positively change the lives of so many during his career. ■
